EXPERIENCE

Project Engineer

OneStep Power Solutions, Houston, TX

- Co-Authored and transmitted to clients engineering deliverables (reports, test plans, procedures)
- Utilized project management software to communicate project details with stakeholders/clients
- Coordinated stakeholder meetings to discuss validation and evidentiary methods for vessel acceptance
- Represented and discussed the company's technology at industry conferences and events
- Assisted in the development of proposals for clients; evaluated needs and estimated resources required
- Involved in the writing of company procedures for core processes such as inventory management and project administration
- Coordinated the collection of evidence and transmission to stakeholders for client's marine assurance document packages
- Attended marine vessels as a test technician and project engineer to provide onsite project management and testing services
- Coordinated international projects with vessels related to both oil and gas and wind industries

Production Engineering Intern

Hess Corporation, Bakken Region, ND

- Shadowed production operations including operator and engineering roles
- Analyzed well logs and documentation for trends impacting scaling above ground
- Utilized LEAN tools to find root causes of project problem
- Evaluated vendor proposed solutions
- Prepared and presented recommendations from findings

Engineering Intern

Blackhawk Specialty Tools, Houston, TX

- Assisted in testing new and existing oilfield tools in a shop environment
- Shadowed applications and R&D engineers
- Completed technical layouts, data sheets, and drawings for applications engineers
